## EXAMINATION AND AWARD OF DEGREE/DIPLOMA

### EXAMINATION SYSTEMS & REFORMS

Brainware University follows the Fully Flexible Credit System (FFCS), under which students register for courses based on their academic interests, individual pace, and programme requirements. Each programme offers a structured basket of University Core, University Elective, Programme Core, and Programme Elective courses, along with opportunities to select interdisciplinary subjects that help broaden competencies. The assessment and evaluation of students are carried out through continuous assessment comprising periodic tests, quizzes, assignments, laboratory work and other formative evaluations, followed by Semester End Examinations for both theory and practical components. All assessments are conducted out of 100 marks and are converted into letter grades on a 10-point scale. The University adopts a combination of absolute and relative grading to ensure fairness and uniformity.

At the end of each semester or academic year, a student's performance is represented through the Semester Grade Point Average (SGPA) or Annual Grade Point Average (AGPA), calculated as the weighted average of grade points secured in all registered courses. Similarly, the Cumulative Grade Point Average (CGPA) reflects the overall academic performance across all completed semesters and is computed using the respective credit and grade point values. These regulations ensure a transparent, robust and academically rigorous evaluation system designed to promote continuous learning, objective assessment, and effective progression of students across all programmes of the University.

## Digital Evaluation & Reforms

Brainware University has a dedicated academic portal (BUIS) that integrates all examination-related modules. During the academic year 2024–2025, several updates and modifications were introduced to strengthen academic and assessment processes. The Question Bank module of BUIS had already been implemented earlier, and during the academic year 2022–2023, all courses across the University were mapped with their respective Course Outcomes and Knowledge Levels. After its successful implementation, Brainware University has now extended the software-based tagging of Course Outcomes and Knowledge Levels in alignment with the syllabus pattern prescribed by the Indian Nursing Council. In parallel, an advanced Moderation Module has been designed to streamline and support the preparation of final question papers for Term-End Examinations.

Further, as per the recommendations of the Ministry of Education (MHRD), Government of India, and the Department of Higher Education, Government of West Bengal, Brainware University has incorporated the ABC ID (Academic Bank of Credits ID) into the Examination Form as well as the Admit Card for the Term-End Examinations. Accordingly, the end-to-end marks processing module has been upgraded to generate an advanced output of ABC-tagged Credit Tabulation for every student, enabling the publication of results along with the simultaneous upload of credit records to the ABC portal for credit transfer and archival.

In addition to these developments, Brainware University is also planning to introduce a software-based Automated Seat Plan for the Term-End Examinations. The Software Requirements Specification (SRS) has already been completed, and the system is currently under testing. It is expected to become fully operational from the academic year 2025–2026 onwards.

The Campus-to-Corporate (C2C) Cell coordinated these programs throughout the academic year to ensure that students received continuous support from pre-placement stages to final selection.

### 2.2 Soft Skills & Corporate Readiness Training

Soft skills remained a major pillar of employability enhancement. The University conducted interactive boot camps that focused on improving students' confidence, communication, and workplace behaviour. These sessions helped students prepare for personal interviews, group discussions, and professional communication.

#### Key Soft Skill Components

- Professional dress code and grooming standards
- Verbal and non-verbal communication
- Resume building and LinkedIn profile structuring
- Interview etiquette and body language
- Mock interviews and frequently asked interview questions
- Group Discussions (GD), HR rounds, and extempore speaking
- Teamwork, conflict resolution, and emotional intelligence
- Decision-making, time management, and stress management

These modules significantly boosted students' confidence and readiness for both corporate and competitive environments.

## 2.3 Aptitude Development Program

To strengthen analytical and logical thinking skills essential for company screening tests, aptitude classes were conducted regularly.

### Aptitude Training Coverage

These sessions helped students align their preparation with placement expectations.

## 2.5 IBM Guided Learning Experience (400+ Students)

One of the most impactful training initiatives of the year was the IBM-certified 3-day learning program, attended by students from AIML, DS, BCA, MCA, RA, BANCS, and MANCS.

- Banking (IBPS, SBI)
- SSC, Railways
- CAT, MAT, MBA entrance tests
- PSU recruitment tests
- Law entrance & judicial service exams
