Address of Applicant :Assistant Professor, Dept. of CSE, 398, Ramkrishnapur Rd, Near Jagadighata Market, Barasat, Kolkata, West Bengal 700125 -----

(57) Abstract :

The present invention relates to a system with an apparatus, technique, and system for the examination of human action, nature, educational behaviour, and the organization's set of policies in order to anticipate belongingness inside the organisation in terms of consistency, dependability, and sustainability. In a supervised setting, a mathematical analysis model known as a support vector machine takes inputs in the form of a labelled data set in order to generate an analysis report. This report assists with making decisions regarding the employee's continued viability. This method and set of tools could be useful in the process of finding suitable candidates for any company.
