 Address of Applicant :Associate Professor, Department of Computational Sciences, Brainware University, 398, Ramkrishnapur Road, Barasat, Near Jagadighata Market, Kolkata, West Bengal 700125 -----

(57) Abstract :
 [027] This invention presents Celestial Gas: A Paradigm-Defying Non-Intrusive Gas Cylinder Level Detection Marvel. The present invention comprising of a non-invasive sensing technology engineered to observe and ascertain the gas level within a gas cylinder without the need for physical contact, components for data analytics and signal processing, facilitating the interpretation of data derived from the non-invasive sensing technology, and an interface for end-users to access real-time gas level data, alerts, and notifications, thereby enhancing the monitoring of gas cylinders. The present invention further incorporating a remote connectivity module for transmitting gas level data and alerts to authorized users via a secure communication network and an adaptable design capable of accommodating various gas types and cylinder sizes. Accompanied Drawings [Figure 1-2]
